REVEGETATION IN THE STRIP-MINED REGION

The revegetation of strip mined areas was near normal this year. The Bureau of Mines office has received planting reports totaling 764 acres for this calendar year. However, Maryland's strip mine Rules and Regulations prohibit consideration for revegetation bond release for the acreage planted this year for at least two growing seasons. A growing season is defined as from early spring until early fall.

The acreage eligible for revegetation bond release this year totaled 961. From this total a record 668 acres were released. This terminated sixteen strip mine permits. The reasons for this large number of acres eligible for bond release were: (1) more acres were strip mined in 1974 and (2) many acres were being held from previous years which did not meet the revegetation specifications until this year.

Another aspect of the revegetation of strip mined land not previously reported in the annual report is the research work being accomplished in the state. There has been work done in cooperation with the Agriculture Research Service in Beltsville, Maryland, for the past five years with regard to species, soil amendments, sewage sludge and compost material. Also work has been done to find the best methods for revegetating steep slopes and very acid areas.

The results of these research studies have been very encouraging. For example, the addition of rock phosphate at a rate of 5 tons per acre for areas that are extremely acid (ph range 2.2-3.8) has demonstrated that herbaceous cover can be obtained.

On steep areas (greater than 20°) the cutting of lateral grooves on the slope face approximately eighteen inches apart has resulted in the establishment of good grass and tree growth and the curtailment of severe erosion.

Other work indicates that the herbaceous species that will grow well in Western Maryland strip mined areas are the following:

Permanent Grasses

KY 31 tall fescue
Orchard grass
Red Fescue
Red Top
Timothy

Long-Lived Legumes

Birdsfoot Trefoil
Crown Vetch

Temporary Grasses and Grains

P. Rye grasses
Weeping Lovegrass
W. Wheat
A. Rye grass
Japanese Millets
Oats

Short-Lived Legumes

Variety of the clovers
Alsike
Hairy Vetch

The Bureau of Mines is just beginning to get involved in research work in Maryland. The results obtained to date are very encouraging; however, time is the ultimate test for making final evaluations.

The Bureau of Mines' future plans indicate that research projects will accelerate, so Maryland reclamation practices will remain one of the best in the country.

LAND RECLAMATION COMMITTEE ANNUAL REPORT

Members

The following members served on the Land Reclamation Committee during 1976:

Department of Natural Resources Representatives

Kenneth N. Weaver (Chairman), Maryland Geological Survey
(1/76-6/76)

L. E. Zeni (Chairman), Energy & Coastal Zone Administration
(7/76-12/76)

Harry B. Buckley, Maryland Bureau of Mines

Stephen M. Layton, Maryland Bureau of Mines

H. Monty Nock, Maryland Geological Survey

Robert V. Creter, Water Resources Administration

Paul Harman, Fisheries Administration (1/76-6/76)

George Gilmore, Forest Service

Allegheny-Garrett Soil Conservation Districts Representative

Ronald Hawk, Allegheny County

John Reckner, Jr., Garrett County

Citizens Representatives

June Neder, Allegheny County

Eugene D. Straub, Garrett County

Coal Industry Representatives

Donald E. Moran (1/76-6/76)

Carl DelSignore (6/76-12/76)

Robert C. Harvey (deceased)

James M. Coffroth (replacement)

Meetings and Time

The Land Reclamation Committee put in twelve committee days during the year. The committee meets on the second Wednesday of each month at the City Building in Westernport, Maryland. Meetings begin at 9:00 a.m. and carry through to completion of the business before the committee. All meetings are open to the public and are announced in the Maryland Register and local papers.

Functions and Duties of The Committee

The Land Reclamation Committee oversees land reclamation activities related to the surface mining of bituminous coal in Maryland. It is specifically directed by statute (Annotated Code of Maryland, Section 7-205/b/) to: “. . . study, recommend, and approve all procedures for reclamation, conservation, and revegetation of any area affected by open-pit mining within the state . . .”

Some of the more important specific duties addressed by the committee during its monthly meetings are:

1. Review, modification, and approval of the mining and reclamation plans.
2. Review and approval of all Annual Mining and Reclamation Progress Reports and Final Reports.
3. Establish amount of revegetation bond for each operation.
4. Inspect all areas for which application is made to determine adequacy of the mining and reclamation plan.

The Site Evaluation Committee functions as a subcommittee of the Land Reclamation Committee and is composed of all members except the Chairman. The Site Evaluation Committee schedules about two days each month to visit sites for which mining and reclamation plans have been filed to determine the suitability of the plan. The Site Evaluation Committee also examines sites for purposes of approval of annual progress reports and final reports.

Status of Reclamation

The Land Reclamation Committee requires that vegetation go through two growing seasons (two years) before planting is approved. Moreover, at least 80% cover of vegetation must be established in order to be approved.

On sites where revegetation has not been successful, the committee requires that the site be replanted and the revegetation bond will remain in force and effect until such time that adequate vegetation is established.

The saving of top soil and spreading it on the backfilled site has improved immeasurably the success of vegetation growth on the reclaimed sites.

Other Activities of The Land Reclamation Committee

In addition to those activities summarized in Table No. 2 covering the past Mining and Reclamation Statistics, the Land Reclamation Committee engaged in the following:

1. Developed revised regulations
2. Approved continuation of a \$600 per acre revegetation bond.

IN MEMORIAM**Robert C. Harvey**

Robert C. Harvey, age 54, Frostburg, Maryland, passed away after a brief illness in the Memorial Hospital, Cumberland, Md., on September 10, 1976.

Mr. Harvey had been active in the coal mining industry in Maryland and in Preston County, West Virginia, for many years. He succeeded C. A. Liller as President of the Coal Miners and Operators Association in Maryland.

He served as an alternate on the Land Reclamation Advisory Committee; and, in 1969, became a member of the Land Reclamation Committee representing industry.

He also served on the Commission of the Maryland Geological Survey from 1972-1976, representing Western Maryland.

Mr. Harvey contributed invaluable services to all of the above positions he held.

STATE MINE EXAMINING BOARD

The fifty-third examination for Mine Foremen was conducted on October 6 and 7, 1976, at the Maryland Bureau of Mines Office, Westernport, Maryland. Eleven persons took the exam. Those successful in taking the examination were: Thomas Herbert Davis, Junior Elwood Goodwin, Gerald Edward Kitzmiller, Paul Elwood Liller, Ernest Dale Lewis, Garry Lewis Mayfield, William Rolandus Maffett, Clarence Robert Paugh, Gary Neil Paugh, Joseph Eugene Peck, and Russell R. Perando.
