Charles Rice, Planning Director
Department of Planning & Growth Management
Charles County
200 Baltimore Street
La Plata, MD 20646

Dear Mr. Rice:

This letter acknowledges the Maryland Department of the Environment's (Department) receipt of Charles County's 2024 Financial Assurance Plan (FAP), and 2024 Watershed Protection and Restoration Program (WPRP) Annual Report as required by the Annotated Code of Maryland. This FAP submission includes information on the cost of compliance with the impervious surface restoration plan (ISRP) requirements outlined in the County's National Pollutant Discharge Elimination System (NPDES) Phase I Municipal Separate Storm Sewer System (MS4) permit.

The ISRP, when sufficiently funded, is essential for restoring local water quality and the Chesapeake Bay, and providing climate resiliency in the County's watersheds. The FAPs are sufficient if they demonstrate that the County has the dedicated revenues, funds, or sources of funds to meet, for the 2-year period immediately following the filing date of the FAP, 100% of the projected costs of compliance with the ISRP requirements of the County's MS4 permit.

After reviewing the County's 2024 FAP, the Department has determined that the County has demonstrated that it has sufficient funding in its FAP. The Department has provided more detailed comments in an attachment for the County's information and use. The County's next WPRP Annual Report will be due in coordination with its next MS4 Annual Report, and its FAP will be due in coordination with the 2026 MS4 Annual Report.

The Department recognizes the substantial effort required in developing these FAPs and WPRP Annual Reports, and looks forward to working with the County on this very important environmental program for improving water quality, stormwater management, and climate resiliency. If you have any questions regarding this review, please contact me at 410-537-3567 or Jennifer M. Smith at 410-537-3561, or jenniferm.smith@maryland.gov.

Sincerely,

D. Lee Currey
Director, Water and Science Administration

Attachment

Review of Charles County's 2024 Financial Assurance Plan (FAP)

Plan Condition	Assessment and Recommendations
Demonstration of Sufficient Funding	<ul style="list-style-type: none"> Charles County (County) submitted its FAP on December 20, 2024. A public hearing was held on November 19, 2024 and the FAP was approved on November 19, 2024. The FAP demonstrated sufficient funding for the projected Impervious Surface Restoration Plan (ISRP) costs for the next two-year period (i.e., FY2025-FY2026).
Actions to Meet Permit Requirements	<ul style="list-style-type: none"> The plan included an Executive Summary. The "All Actions" worksheet included best management practices (BMPs) and associated costs for FY2025 to FY2029. For the next two years (FY2025-FY2026), the County plans to complete 203 acres of new restoration. Additionally, the County will maintain 98 acres of operational BMPs established in the previous permit.
Annual and Projected Costs	<ul style="list-style-type: none"> The "All Actions - Planned" worksheet indicated that projected cost for new restoration to be implemented over the next two fiscal years (FY2025-FY2026) is \$8.6 million (M), and the projected cost for maintaining operational BMPs established during the previous permit is \$0.7M. In the "ISRP Costs" worksheet, costs were reported through FY2029, and the cost for the next two years is \$13.5M. The FY2025 to FY2026 costs reported in the "ISRP Revenue" worksheet (i.e., \$12.9M) was less than the FY2025 to FY2026 costs reported in the "ISRP Cost" worksheet (i.e., \$13.5M). For this determination, the Department used the amounts listed in the "ISRP Costs" worksheet. Please ensure these numbers match in future submittals.
Annual and Projected Revenues	<ul style="list-style-type: none"> The "ISRP Revenue" worksheet included projected revenues through FY2029. Reported revenue for FY2025 to FY2026 (\$31.1M) is greater than the projected ISRP costs (\$13.5M).
Funding Sources	<ul style="list-style-type: none"> In the "Fund Sources" worksheet, fund sources were projected through FY2029. Sources of funds for the next two years included: <ul style="list-style-type: none"> Stormwater Remediation Fee = \$16.6M General Obligation Bonds = \$14.5M Federal Grants = \$4.8M Fees - Inspection & Review Fund, and Miscellaneous = \$2.7M State Grants = \$0.1M Total Funding Sources = \$38.8M
Specific Actions and Expenditures from Previous Fiscal Years	<ul style="list-style-type: none"> The "Specific Actions – Completed" worksheet included FY2020 to FY2024 BMPs and expenditures for 557 acres of new restoration and 139 acres of BMPs to maintain and replace operational BMPs established in the permit.
