Hello,

I just wanted to drop a line to let you know that I am in full support for the continuation relicensing of the Conowingo dam I feel that it is a very good support for the area communities that being for the fishing and also it's an area of recreation let alone fishing. Speaking of the fishing I feel that the Conowingo dam and what they have in place as far as the fish ladders and the support of the shad run as well as all other species that pass up through the ladder to restoring the Susquehanna River to it's almost once was. It will never get there because of all the dams currently on the river.

However I had worked there at the damn many years in the past and I understand the construction and also what this means as far as jobs to the area folks also. I do think that the way that they have the releases in the river is very beneficial to the fish when I do run the damn I see this in my fishing when I fish out of lab at them and I think that the DNR is in full support of this it's just such a beautiful natural area for all the wildlife that I see when I fishing. I look forward to this and drive an hour each way from york county Pennsylvania to fish that area in the spring and spring time right up into the beginning of summer.
