In making a decision, the board is guided by the public policy of the state in considering applicable, ecological, economic, 6 developmental, recreation and aesthetic values to preserve 7 tidal wetlands and prevent their destruction. 8

I am now going to read briefly from the regulations so that it is clear how we are going to proceed. Under COMAR 26.24.01.05E through G, an applicant 11 and any interested person shall be given an opportunity at the informational hearing to present the facts and make statements supporting or opposing the license. The hearing 14 is not a contested case hearing under Maryland's Administrative Procedure Act.

16 In order, the order of the presentation is determined by the hearing officer and will be conducted as 18 follows. Introduction of the activity in participants by the hearing officer, presentation of the proposed project 20 by the applicant, statements by public officials, statements by the public, closing the informational hearing

1 by the hearing officer.

The hearing officer has the authority and duty to conduct a full and fair public informational hearing, act to avoid unnecessary delay and maintain order, regulate the course of the hearing and the conduct of the participants, extend the time period for providing supplemental written comments or information for inclusion in the hearing record, and rule upon request for a continuance of the hearing if necessary.

At the close of the comment period, the hearing officer shall prepare an official record of the public informational hearing and comments. It is also the responsibility of my office to evaluate requests for water quality certifications under §401 of the Clean Water Act, which requires Maryland as a certifying authority to 16 determine whether the discharge associated with U.S. Army Corps of Engineers permit application NAB-2020, that's 2-0-18 2-0, dash 60863 complies with the state's water quality standards.

The department's authority is found in subtitle 9

of the environment article. Each certification request

received through our regulatory program has specific and

unique issues and impacts that must be considered regarding

Maryland's water quality standards. The department is

neither a proponent nor an opponent of the project.

In summary, the Maryland Department of

Environment is conducting a public information hearing for

state tidal wetlands application number 23-WL-0813

submitted on September 8, 2023, and Clean Water Act §401,

Water Quality Certification Request 24-WQC-0004, received

on January 16, 2024.

The application request authorization to remove an existing pier and associated structures and construct a 625-foot-long by 32-foot-wide concrete pier with associated wave break and timber fenders, all extending a maximum of 15 390 feet channel work of the mean high-water line.

They also, the application also requests construction of 435 linear feet of a replacement bulkhead with associated timber fenders, all within a maximum of 18 inches channel work of the mean high-water line. A <sup>20</sup> revision to the proposed project above was received by the department on March 15, 2024. U.S. Wind is proposing to

reduce the 32-foot-wide pier to 174 feet, a reduction of

451 feet. The remaining 451 feet of existing pier will

remain at 12 feet wide. The replacement bulkhead is

reduced from the original 435 linear feet to 381 linear

feet, a reduction of 54 feet.

The purpose of the project is to provide navigational access, provide facilities for operation and 8 maintenance activities, and protect the shoreline from 9 further erosion. There may be additional concerns related to issues that are beyond the scope of this hearing for the proposed activities proposed in the state tidal wetlands application or the water quality certification decision.

I ask that this hearing remain focused on issues 14 associated with those activities under review by the department for the state tidal wetlands license application <sup>16</sup> in a request for a state water quality certification. Thank you.

Andrew Bing, tonight's public hearing facilitator, will now begin the hearing.

MR. BING: Okay. Okay. Hopefully everyone can

<sup>21</sup> hear me. Is this on? I'm not hearing it. There we go.

The purpose of this On their behalf, they had unanimously opposed the 13 public hearing is to allow interested parties to provide original application. While we have submitted written 14 public comments related to the tidal wetland license. My comments detailing the many impacts we saw with what was proposed originally, we have to appreciate the reduction in role as a hearing facilitator is to run a professional and 16 orderly public hearing. 16 the scope of that, and much like the reduced scope, I have 17 17 I understand how important these issues are, and reduced my comments. 18 I take my role as hearing facilitator seriously. I am 18 The area around the site is known for having committed to providing members of the public an opportunity clams, submerged aquatic vegetation, and it's also spawning to provide comments in an organized, fair, professional and grounds for summer flounder in the spring, also known as orderly manner. construction should be minimized and the choice of piling and other submerged materials should be chosen to minimize any bleaching into the water.

The harbor and the associated coastal bay, they 5 have a slow flushing time, and the longer any disturbance, 6 any contamination, it's going to just stay and have a much larger impact overall. You know, the main point I think we would like to make is that it's a little disappointing if not a little insulting to have a public hearing 30 minutes west of the project site.

(Applause)

12 MR. YOUNG: Thank you. In a neighboring county 13 that's completely unaffected by the proposed project. I do want to say, you know, the last-minute change in the scope 15 ten days ago while it appears favorable, should have re-16 triggered, or should have triggered a rescheduling of this public hearing, because it is (indiscernible due to 18 applause) than what many of us focused on. So thank you 19 for your time.

20 MR. BING: Okay. Thank you. I'm not aware of any other elected officials who signed in. I was not handed

Page 15 1 that. Is there any other elected official here who would like to, yes, sir. Come on up. Sorry, I'm not aware of your name. Please just introduce yourself. Spell your name and who you are representing.

MR. MCGEAN: Yes. My name is Terance McGean --T-E-R-A-N-C-E -- M-C-G-E-A-N. I'm here on behalf of the Mayor and City Council of the town of Ocean City. I am the city manager of the town of Ocean City. I appreciate at 9 least the opportunity to speak, which has not been given to us at other hearings, so thank you for that, and I'm sure others may appreciate that as well.

12 Similar to the county administrator, it is, was a 13 little disturbing to see the quick change to this, you know, when, again, it may be beneficial, it may not be 15 beneficial, it would have been nice to have a little more 16 time to digest the changes that have been made prior to 17 this hearing, and I would agree the hearing should have been delayed and also located in the county in which the 19 work is going to be done. 20 The U.S. Wind project as a whole is a threat to

21 the Ocean City area economy, and this proposal --

2 MR. BING: Everyone, I'm going to grant you a little bit, but at this point we have a lot of people who 4 have signed up to provide testimony. My role as <sup>5</sup> facilitator is to try to get to as many members of the public as we can. First of all, I'm going to give you all 7 your time.

We still have plenty of seats over here. I would encourage people just to walk through the back and come over here. I understand it's tempting to want to support and clap for things you like and maybe boo or something. We're not going to do that tonight. This is a hearing where we want to, I want to hear people's comments, and every time you clap or boo or anything, it's just going to delay that. So please respect that. Continue.

MR. MCGEAN: Thank you. This project simply makes that threat, increases that threat. Ocean City is 18 about tourism. We're about going to the beach, surf fishing, eating fresh caught seafood overlooking our 20 fishing fleet. We are not Sparrow's Point, nor do we wish to become Sparrow's Point, and the industrialization of our

Page 17

Page 16

harbor and our ocean that U.S. Wind is proposing, I can't think of any bigger impact, negative impact, on water 3 quality than that.

This project will displace our existing commercial fishing fleet, which is already struggling for survival. Again, it's bad enough that U.S. Wind wants to destroy their finishing grounds, now they want their dock space as well.

We also have significant concerns about driving a 100-foot-long piling in the harbor. As the county administrator mentioned, that impact on summer flounder and shellfish. This project will also restrict the entrance to the harbor. Everyone knows that harbor is already 14 incredibly congested. You're going to narrow the throat of 15 it.

We don't know what the size of the fleet that U.S. Wind is proposing or how often it's going to be entering and leaving the harbor, and what kind of impact that's going to have on existing navigation in the harbor. Just to, again, because things change

significantly, my remarks are shorter than they were

Page 18 Page 20 planned, but I would ask in the interest of water quality, traffic in the harbor, including barges and crew transport let's save the West Ocean City harbor for the fishing vessels, not to mention supply trucks on secondary roads. 3 fleet, and let's not turn it into Sparrow's Point. Page 30 MS. HOLLIS: I'm Jennifer Hollis, H-O-L-L-I-S, 12024 Ocean Gateway, Ocean City, Maryland 21842. I have some questions. When I was speaking outside, they don't 4 have a piling count for the pier. They don't have any <sup>5</sup> discussion about how high the cranes are going to be that 6 are going to be on the piers and how high and how far they're going to stick out over the water.

They don't have any contractors in place right now that are going to do the pier and piling work. Is the permit only for the repair and extension of the current 11 pier? And how far into the settlement are they with the 12 properties for (indiscernible) and if, how can they apply 13 for permits when they don't have ownership of a piece of real estate?

15 We want to know what they're going to do at the 16 ingress and egress and how it's going to change Harbor Road, how big the boats are and will they impact the 18 channel and the dredging for the inlet? Does that fall back on the residents of Worcester County that have to pay <sup>20</sup> for it, that when they do all the stirring up, we are already having problems with dredging in the channel. Is

Page 31

1 that going to go to the taxpayers?

We want to know if there are going to be hour limits on the boats coming and going. I understand from speaking to the gentleman outside with U.S. Wind they are only going to be moving tools to and from the wind turbines 6 on this, from this pier. Are the wind turbine tools only 7 for Delaware work? Does this have anything to do with 8 anything that's going on in the Maryland (indiscernible) or 9 is this for another state? We need to answer that question.

Can they apply for permits without ownership? I want to know, are there any vehicles going to be on the pier? They have a picture of a pickup truck. We're not 14 allowed to do that with the pier that's currently in place, 15 so why would they be able to do driving on the piers, the 16 restaurants and everything --

MR. BING: (indiscernible)

MS. HOLLIS: -- else can't do that. What about 19 the noise pollution? Is it going to impact the noise? <sup>20</sup> It's going to impact the neighbors and the residential people that are living on the back side. What about the utilities when they put the pier in? Also, if they can

reduce the size of the pier once the permit is issued, can

they expand it?

4 MR. BING: Wrap up your --

5 MS. HOLLIS: Thank you. I'm done.

6 MR. BING: Okay. Thank you. Okay. Next up we're

going to have Dianna Harris. After that will be Skip

Courtney, and after that, Jay Walker. If you could state

your name, spell your name, and your address.

10 MS. HARRIS: My name is Dianna Harris -- D-I-A-N-

11 N-A, H-A-R-R-I-S, and I reside at 9742 Golf Course Road in

Ocean City, Maryland. As with everybody else, my statement

changed around 1:00 this afternoon when I found out that

14 the plans had so vastly changed, but regardless of that, I

was going to share with you that the plans that I

16 originally saw were vastly different from what I read in

the environmental impact statements, and as such, NEPA

requires an independent environmental study, and I don't

19 believe that's been done yet.

20 I'm trying to flip here since it's become so

different, but it is concerning to me that (indiscernible)

now proposes in states that the company only needs two

vessels, that's all that's being shown on these plans, when

in the original (indiscernible) and I quote, "Operation of

the proposed action could generate up to seven vessels and

an average of 1,644 annual transits with most trips

consisting of service operation vessels and crew transfer

vessels to and from Ocean City."

8 So I'll make this short since things have changed. What's written in your construction and operation 10 plans and what's written in the original environmental impact statement in no way, shape or form match what we

were just given the opportunity to see today at 1:00. It's vastly different, and so I do pose the question, are we

14 incrementally creating the original desire? Is this the

first permit, and then we'll go for another permit and then

16 another permit?

How can U.S. Wind now say that two vessels will 18 now take care of what they once thought would require up to 19 7 and almost 2,000 trips per year? Thank you.

MR. BING: Okay. Thank you. We are next going to

21 hear from Skip Courtney. Skip here? Oh, there we go. Jay

Page that harbor, and you're going to put a 30-foot-wide support vessel on the end of a 10-foot bulkhead? You are going to make it almost impossible and pretty much dangerous.

The next thing is there's no full construction <sup>5</sup> plans. We're seeing plans that show pilings, and this is 6 how big the bulkhead is going to be. So who is the construction company, how are they planning to do the demolition? How are they planning to do the construction? What kind of cranes, also known as whirlies, are they going to use to drive the pile? None of this is laid out there.

I do commercial demolition in Baltimore City for my full-time job. I demolish piers, dilapidated piers for a 13 living. The environmental impact that A, the demolition of the existing pier in the practical reef that's growing on 15 it will, the cost to the water will be detrimental.

On top of that, we have the pile driver. I suggest everyone in the immediate vicinity put --

MR. BING: Thirty seconds.

19 MR. BUTLER -- vibration monitors in your house, <sup>20</sup> because you're going to be getting cracks in your walls and everything else. So that's all I have to say. Thank you.

Page 43 MR. BING: Thank you. Next we're going to hear from Lindsay Meeks. After Lindsay will be Richard Nieman, and then Kate McCloskey.

MS. MEEKS: Hello. My name is Lindsay Meeks, I live at 113 Pitt Street in Berlin, Maryland.

MR. BING: Just spell your name, please.

MS. MEEKS: L-I-N-D-S-A-Y, M-E-E-K-S. I'm a Worcester County resident, I'm a property owner. I also am a member of the Delmarva Condo Manager's Association, and (indiscernible) Manager's Association.

In my opinion, revised plans should have resulted in a public hearing process and permitting process being completely restarted. In regard to the tidal wetland 14 application, the proposed plans are not factual. They do not have piling counts, they do not have factual 16 perpendicular dimensions that are going out into the harbor, or do they have dimensions on the vessels that will 18 be parked there to service these wind farms.

19 The plan sheets do not meet the requirements of the wetlands and waterways programs tidal wetland division general checklist. Will this be another bait and switch

permitting process, just like the permitting of the wind

turbine heights and distances offshore?

3

11

In regard to the water quality certification, has it been waived from the legislative changes that took place in November of 2023 in regard to the Section 401 of the 6 Clean Water Act? Are we still entitled to the processes 7 laid out in the water quality certification process. Thank 8 you.

9 MR. BING: Thank you. Okay. Our next speaker will 10 be Richard Nieman. After Richard will be Kate McCloskey.

MR. NIEMAN: Name is Richard Nieman, that's spelled, I think you got Richard, R-I-C-H-A-R-D, and Nieman would be N as in Nancy, I-E-M-A-N, 45 Wood Duck Drive, 14 Berlin, Maryland 21811. I am here as a member of the 15 Atlantic Coast Sport Fishing Association. 16

My biggest concern here, I'll say ditto to everything that was said so far, except for we may have special jobs coming here. I don't think we need the types of jobs coming here that are going to eliminate the other jobs, the fishermen and everybody else, builders and such, because of what's happening.

Page 45 The biggest thing that we were trying to do as an

organization was as the Atlantic Coast Sport Fishing Association put some truth in this whole process. When this started with U.S. Wind, we did a very good job of doing that, getting rid of people telling us that things were only going to be this high, and others saying they were going to be this high, and I said, go find out what it 8 really is.

In this particular case, I could tell you it would be hypocritical for us as an organization to go along with the change here, and the basic reasoning is being if we didn't support, we voted not to support U.S. Wind as far as offshore, and it would be hypocritical for us to now 14 turn around and say we're going to support the support for 15 the project that we didn't support, if that makes sense to 16 you, okay?

So with that in mind, just as an example of our (indiscernible) when we were told originally we had plans that these turbines are going to be so high. These turbines right now if you count with what goes in the ground, one of these poles is going to be, the mono pile is

10

The one thing that hasn't been 18 18 like the red-headed stepchild down here all the time. This spoken about is the impact on families. 19 windmill stuff out there is ridiculous, this is part of it. My husband and I have been coming down here for 20 The meeting, the Atlantic (indiscernible) 20 35 years. We owned a vacation home here, we had a vacation Sportsman's Association, we've heard all the good about it, 21 condo here. We moved here full time, ten days after our Page 83 Page 85 we've heard all the bad about it. We made up our own youngest son graduated from high school, because that's decisions about it that we don't want it. Now, this is where we wanted to be. The impact that this area has had on our lives with our children right of Assateague Island 3 just another push to bring it in there. There's no room down there for any of this. If they think they can make they are just fishing with them, exploring and we have that turn at the corner to take their window blades down three sons, and it was just a marvelous experience. there, I've seen them on the highways, there's no way. My husband and I had a clam farm. I just can't even fathom what the watermen here are going through right The white marlin mall would be wiped out if they 8 tried to make that turn.
