UNCLASSIFIED

Thank you. I am surprised that we were not notified of this permit application, Mr. Spendiff, and I understand it is not a requirement. My last recollection of this project was that it was put on hold due to many issues. Is the project now moving forward?

Comment:

1. The planned route passes close to the boundary of Fort George G. Meade and NSA likely impacting water quality at both. Please detail communications with both, identify their concerns, and how they will be addressed.
2. Prior to the issuance of the Permit Applicant needs to meet with appropriate individuals at Fort George G. Meade and NSA to ensure project impacts to water quality within and around Fort George G. Meade / NSA were adequately identified and that mitigation aligns with agency requirements, security, and future plans. Please acknowledge.

Good morning,

You can submit to me directly via email.

Thank you.

Mr. Spendiff,

Would like to submit comments to the BWRR Request for Water Quality Certification 23-WQC-0007 (Tracking Number 202061983, AI No. 170244). Is there a link to submit comments or should I submit to you?
