

May 1, 2024

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Friday, May 31, 2024.

Water Supply Program - (410) 537-3590

County: Baltimore City

BC2023G001/02: Skanska USA Inc. has applied to increase an existing appropriation from an annual average of 216,000 gallons of water per day (gpd) and an average of 237,600 gpd in the month of maximum to 432,000 gpd and 475,000 gpd, respectively. The water will be withdrawn from multiple wells in the Potomac Group to facilitate the construction of the tunnel deepening project. The project is located inside the Howard Street Tunnel and between the Howard Street Tunnel East Portal and the North Avenue Bridge, Baltimore City, Maryland.

County: Kent

KE1999G014/04: Duck Puddle Farming Enterprises, LLC has applied to increase an existing allocation from an annual average of 81,000 gallons of groundwater per day (gpd) and an average of 490,000 (gpd) during the month of maximum use, to an annual average of 173,000 gpd and an average of 1,053,000 gpd during the month of maximum use. Water will be withdrawn from two wells in the Aquia aquifer and used for crop irrigation. The project is located on the north side of Carroll Clark Road, 0.2 mile east of the intersection with Blue Star Memorial Highway, Massey, Kent County, Maryland.

County: Worcester

WO2024G001/01: Clayville Farm has applied to appropriate and use an annual average of 40,000 gallons of groundwater per day (gpd) and an average of 244,000 (gpd) during the month of maximum use. Water will be withdrawn from up to three wells in the Columbia aquifer and used for crop irrigation. The project is located at 6146 Whiton Road, Snow Hill, Worcester County, Maryland.
