

**August 1, 2025**

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Sunday, August 31, 2025.

**Water Supply Program - (410) 537-3590**

**County: Calvert**

CA1986G007/08: Board of Commissioners Calvert County has applied to increase an existing allocation from an annual average of 30,000 gallons of water per day (gpd) and an average of 45,000 gpd during the month of maximum use to 45,000 and 75,000 gpd, respectively. The water will be taken from two existing wells and two new wells, all in the Aquia aquifer and used for public water supply for the Saint Leonard community water system. The project is located at 200 Calvert Beach Road and 5388 St. Leonard Road, St. Leonard, Calvert County, Maryland.

**County: Caroline**

CO2025G005/01: Gregory N. Turner has applied to appropriate and use an annual average of 30,000 gallons of groundwater per day (gpd) and an average of 183,000 (gpd) during the month of maximum use for crop irrigation. Water will be withdrawn from three wells in the Columbia aquifer. The project is located at 4014 Poplar Neck Road, Preston, Caroline County, Maryland.

**County: Carroll**

CL2025G001/01: Maryland Stadium Authority has applied to appropriate and use an annual average of 39,000 gallons of groundwater per day (gpd) and an average during the month of maximum use of 75,000 gpd from up to four wells in the Gillis Formation for a potable supply, sanitary facilities, and other uses related to a racehorse training facility. The project is located at 4926 Woodbine Road, Woodbine, Carroll County, Maryland.

**County: Dorchester**

DO1951G101/01: Darling Ingredients Linkwood Division has applied to appropriate and use an annual average of 40,000 gallons of groundwater per day (gpd) and an average of 40,000 gpd during the month of maximum use for process water, truck washing, sanitary facilities, and a potable supply at a poultry rendering plant. Water will be withdrawn from two wells in the Piney Point Formation. The project is located at 5420 Linkwood Road, Linkwood, Dorchester County, Maryland.

**County: Frederick**

FR2001G022/04: Town of Mount Airy has applied to increase an existing appropriation from an annual average of 79,000 gallons of groundwater per day (gpd) to an annual average of 129,000 gpd with no change to the maximum month use of 204,000 gpd. Water will be withdrawn from one well in the Ijamsville Formation and used for a municipal water supply for the Town of Mount Airy. The project is located at 502G North Annapolis Drive, Mount Airy, Frederick County, Maryland.

**County: Prince Georges**

PG2025G003/01: Mortenson Construction Company has applied to appropriate and use an annual average of 200,000 gallons of groundwater per day (gpd) and an average of 720,000 gpd in the month of maximum use. The water will be withdrawn from up to 120 well points drilled in the Upland Deposits to lower the groundwater level to facilitate the installation of hydrant fueling systems and piping across three aircraft parking rows at Joint Base Andrews. The project is located at 1832 Robert M. Bond Drive, Joint Base Andrews, Camp Springs, Prince George's County, Maryland.

**County: St. Mary's**

SM2025G001/01: St. Mary's County Commissioners have applied to appropriate and use an annual average of 50,000 gallons of water per day (gpd) and an average of 60,000 gpd during the month of maximum use for golf course irrigation. Water will be withdrawn from one well in the Aquia aquifer. The project is located at 35720 Golf Course Drive, Mechanicsville, St. Mary's County, Maryland.

**County: Worcester**

WO2016G008/02: Fiaz Munir has applied to increase an existing allocation from an annual average of 9,000 gallons of groundwater per day (gpd) and an average of 18,000 gpd during the month of maximum use, to an annual average of 15,000 gpd and an average of 30,000 gpd during the month of maximum use for a poultry operation. Water will be withdrawn from eight well(s) in the Manokin aquifer. The project is located at 1725 Buck Harbor Road, Pocomoke, Worcester County, Maryland.
