

**February 1, 2025**

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Friday, February 28, 2025.

**Water Supply Program - (410) 537-3590**

**County: Caroline**

CO2024G012/01: Bradley Osborne has applied to appropriate and use an annual average of 70,000 gallons of groundwater per day (gpd) and an average of 427,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from up to three wells in the Columbia aquifer. The project is located at 13414 Oakland Road, Ridgely, Caroline County, Maryland.

CO2024G013/01: Richard Jamison has applied to appropriate and use an annual average of 40,000 gallons of groundwater per day (gpd) and an average of 240,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from one well in the Columbia aquifer. The project is located at 1860 Oak Grove Road, Federalsburg, Caroline County, Maryland.

CO2024G014/01: Christopher Schoonover has applied to appropriate and use an annual average of 122,000 gallons of groundwater per day (gpd) and an average of 740,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from three wells in the Columbia aquifer. The project is located at 302 Granby Street, Greensboro, Caroline County MD.

**County: Kent**

KE2025G001/01: Lester C. Jones & Sons, Inc. has applied to appropriate and use an annual average of 58,000 gallons of groundwater per day (gpd) and an average of 667,000 (gpd) during the month of maximum use for crop irrigation. Water will be withdrawn from one well in the Magothy aquifer. The project is located at 32545 Galena-Sassafras Road, Galena, Kent County, Maryland.
