

**May 1, 2026**

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Sunday, May 31, 2026.

**Water Supply Program - (410) 537-3590**

**County: Baltimore**

BA2026G001/01: Baltimore Gas and Electric Company has applied to appropriate and use an annual average of 24,000 gallons of groundwater per day (gpd) and an average of 144,000 gpd in the month of maximum use. The water will be withdrawn from one well in the unconfined Lower Patapsco formation to lower water levels to facilitate the remediation of soils at the BGE Riverside Facility. The project is located at Sollers Point Peninsula, 4000 Broening Highway, Dundalk, Baltimore County, Maryland.

**County: Kent**

KE1986G004/08: Tideland Gardens, Inc. has applied to increase an existing allocation from an annual average of 60,000 gallons of groundwater per day (gpd) and an average of 120,000 gpd during the month of maximum use, to an annual average of 135,000 gpd and an average of 270,000 gpd during the month of maximum use for a potable supply, sanitary uses, and nursery stock irrigation. Water will be withdrawn from six wells in the Aquia aquifer. The project is located at 10040 Perkins Hill Road, Chestertown, Kent County, Maryland.

KE2002G010/03: York Farm, LLC has applied to increase an existing allocation from an annual average of 6,800 gallons of groundwater per day (gpd) and an average of 27,300 gpd during the month of maximum use, to an annual average of 18,000 gpd and an average of 144,000 gpd during the month of maximum use for filling a wildlife pond. Water will be withdrawn from one well in the Aquia aquifer. The project is located at 6550 Quaker Neck Road, Chestertown, Kent County, Maryland.

**County: Washington**

WA2026G001/01: KC Construction Co. has applied to appropriate and use an annual average of 322,500 gallons of groundwater per day (gpd) and an average of 645,000 gpd in the month of maximum use to temporarily lower the groundwater level to facilitate construction dewatering for the Greenbrier State Park Dam Repairs project. Water is to be withdrawn from up to 20 well points in the Antietam formation. The project is located at 21843 National Pike, Boonsboro, Washington County, Maryland.

**County: Wicomico**

WI2025G002/01: Sustainable Land Use, LLC has applied to appropriate and use an annual average of 1,620,000 gallons of groundwater per day (gpd) and an average during the month of maximum use of 3,888,000 gpd for washing sand and gravel and dust suppression. Water will be withdrawn from an existing mine in the Columbia aquifer. The project is located near 25770 Ocean Gateway, approximately 1 mile northeast of the junction of Barren Creek Road and Ocean Gateway, Mardela Springs, Wicomico County, Maryland.
