

October 1, 2026

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Saturday, October 31, 2026.

Water Supply Program - (410) 537-3590

County: Kent

KE1977G001/06 and KE2026S001/01: Owings and Sons Business Trust has applied to increase a total annual average allocation of 346,000 gallons per day (gpd) to 372,000 gpd, which will be split between two permits. The application for the existing permit KE1977G001/06 requests to appropriate and use an annual average of 186,000 gpd and an average during the month of maximum use of 2,373,000 gpd. Water will be withdrawn from three existing wells and three new wells, all in the Aquia aquifer, for crop irrigation and filling wildlife ponds. The application for new permit KE2026S001/01 requests an allocation of 186,000 gpd and a maximum daily withdrawal of 1,440,000 gallons. Water will be withdrawn from one intake on Chesterville Branch and used for crop irrigation. The total allocation between both permits can be withdrawn from either water source as long as the combined withdrawals do not exceed the combined annual average allocation. The projects are located at 29765 and 29851 River Road, Millington, Kent County, Maryland.

County: Prince Georges

PG2026G004/01: Norair Engineering Corp. has applied to appropriate and use an annual average of 20,000 gallons of groundwater per day (gpd) and an average of 242,300 gpd in the month of maximum use to temporarily lower the groundwater level to facilitate construction dewatering for a Washington Suburban Sanitary Commission (WSSC) sanitary pumping station. Water is to be withdrawn from up to two well points in the Upland Deposits. The project is located at 13106 Cherry Tree Crossing Road, Brandywine, Prince George's County, Maryland.
