

**November 1, 2021**

The Water and Science Administration has received the applications listed below. A preliminary review has indicated that the listed projects may be subject to the opportunity for a public hearing once the application is substantially complete. Projects may be significantly altered during the review process. The applications and related information are available for inspection and copying. You may also request written notice of any hearing opportunity by having your name placed on the interested persons list for each project in which you are interested. To inspect the file or to have your name placed on the interested persons list, contact the assigned division at the telephone number indicated below no later than Tuesday, November 30, 2021.

**Water Supply Program - (410) 537-3590**

**County: Anne Arundel**

AA2017G001/03: Maryland Department of Transportation - Maryland Port Administration has applied to increase an existing appropriation from an annual average of 126,000 gallons of groundwater per day (gpd) and an average of 180,000 gpd during the month of maximum use, to 292,000 gpd and 359,500 gpd, respectively, for construction dewatering. Water will be withdrawn from multiple sumps in the Artificial Fill/ Quaternary System Sediments. The project is located at 1000 Kembo Road, Curtis Bay, Anne Arundel County, Maryland.

**County: Caroline**

CO2021G006/01: Sunnyside Enterprises, LLC has applied to appropriate and use an annual average of 15,500 gallons of groundwater per day (gpd) and an average during the month of maximum use of 92,000 gpd for crop irrigation. Water will be withdrawn from one new well in the Columbia aquifer. The project is located at 12050 Crouse Mill Road, Ridgely, Caroline County, Maryland.

**County: Dorchester**

DO2021G004/01: William A. O' Day & Son LLC has applied to appropriate and use an annual average of 39,250 gallons of groundwater per day (gpd) and an average of 239,000 gpd during the month of maximum use for crop irrigation. Water will be withdrawn from one well in the Columbia aquifer. The project is located on the west side of Galestown-Reliance Road, 0.5 mile south of its intersection with Delaware Line Road, Galestown, Dorchester County, Maryland.

**County: Montgomery**

MO2021G005/01: Clark Foundations, LLC has applied to appropriate and use an annual average of 227,000 gallons of groundwater per day (gpd) and an average of 345,600 gpd during the month of maximum use for construction dewatering at the Twinbrook Quarters site. Water will be withdrawn from 12 well points in the Upper Pelitic Schist of the Wissahickon Formation. The project is located at 1500 Rockville Pike, Rockville, Montgomery County, Maryland.

MO2021G006/01: Clark Construction Group, LLC has applied to appropriate and use an annual average of 24,000 gallons of groundwater per day (gpd) and an average of 60,000 gpd during the month of maximum use for construction dewatering at the Mid-Pike Plaza site. Water will be withdrawn from 8 well points in the Upper Pelitic Schist of the Wissahickon Formation. The project is located at 955 Meeting Street, Rockville, Montgomery County, Maryland.
