## PERMIT RENEWAL STATUS (21-DP-0580)

2021

### September

- Permit renewal application received by MDE.

### December

- Notice of Application Received published in "*The Sun*."

2024

### April

- Draft permit & SRFS sent to Baltimore City & EPA for review.

### May

- EPA comments received on the draft permit.

### July

- Baltimore City comments received on the draft permit.

### November

- Revised draft permit, SRFS, and Comment Response Document (CRD) sent to EPA by MDE.

2025

### March

- Latest revision of draft permit, SRFS, and a revised CRD sent to Baltimore City & EPA by MDE.

### May

- Combo Public Notice for Tentative Determination & Public Hearing published in "*The Sun*."

### June

- Public Hearing Held.

## APPLICANT & FACILITY INFORMATION

---

<b>Facility Name:</b>	Patapsco WWTP
<b>Applicant:</b>	Mayor and City Council of Baltimore, City Hall
<b>Mailing Address:</b>	100 North Holliday Street, Baltimore, MD 21202
<b>Brief Description:</b>	The WWTP is a tertiary Enhanced Nutrient Removal (ENR) treatment system with an 81 MGD design capacity. It serves Baltimore City, Baltimore County, Anne Arundel County and Howard County with a population of approximately <u>504,000</u> . The ENR upgrade was completed and made operational in January 2020.
<b>Facility Location:</b>	3501 Asiatic Avenue, Baltimore, MD 21226

## FACILITY AND OUTFALL LOCATION

## AERIAL VIEW: PATAPSCO WWTP & OUTFALL 001A

### Outfall 001A

Lat: 39° 14' 06.0" N

Long: 76° 33' 20.2" W

## RECEIVING STREAM INFORMATION

<b>Outfall</b>	001A
<b>Name of Stream</b>	Patapsco River
<b>Type of Stream</b>	Tidal River
<b>Watershed</b>	Baltimore Harbor (02-13-09-03)
<b>Chesapeake Bay Model Segment</b>	Patapsco River Mesohaline (PATMH)
<b>Stream Use Designation</b>	Use II (Non-shellfish harvesting): Water protected for estuary and marine aquatic life, and water contact recreation

---

# FACILITY PERFORMANCE SUMMARY

*January 2018 - December 2024*

## FLOW: ANNUAL AVERAGE DISCHARGE SUMMARY, MGD (1/2018 – 12/2024)

---

Year	2018	2019	2020	2021	2022	2023	2024
<b>Outfall 001A</b> <b>73 MGD</b> <b>(Permitted Capacity)</b>	70.29	52.62	49.44	50.26	51.65	51.78	50.70

## EFFLUENT LIMIT EXCEEDANCE SUMMARY (1/2018 – 12/2024)

Effluent Parameter	2018	2019	2020	2021	2022	2023	2024
BOD <sub>5</sub>	4	4	4	8	7	0	1
TSS	4	8	10	13	5	0	1
pH	0	0	0	0	0	0	1
Enterococci	2	3	3	5	3	0	0
TP	12	11	9	21	22	0	0
TN	17	0	7	12	15	0	0
Total Ammonia as N	10	0	1	8	15	0	0
DO	0	1	0	1	0	0	0

## TSS: ANNUAL LOADING RATE (lb/year) CHESAPEAKE BAY TMDL (01/2018 - 12/2024)

## TOTAL PHOSPHORUS: ANNUAL LOADING RATE (lb/year) CHESAPEAKE BAY TMDL (01/2018 - 12/2024)

## TOTAL NITROGEN: ANNUAL LOADING RATE (lb/year) CHESAPEAKE BAY TMDL (01/2018 - 12/2024)

---

# PROPOSED NEW PERMIT REQUIREMENTS

## PROPOSED PERMIT REQUIREMENTS (NEW)

---

A. Effluent Limits		
	Requirement	Rationale
1.	BOD <sub>5</sub> & TSS 85% removal effluent limit.	Minimum Requirements for Secondary Treatment Standards (40 CFR 133.102)

## PROPOSED PERMIT REQUIREMENTS (NEW), *cont'd*

### B. Monitoring & Reporting

	Requirement	Rationale
1.	Additional monitoring of 18 pollutant parameters	Pollutants exceeding in-stream toxicity criteria during Reasonable Potential (RP) analysis
2.	Nutrient & Sediment Performance-based credit reporting	Provide eligibility to participate in effluent performance trading ( <i>COMAR 26.08.11</i> )
3.	PFAS Testing & Analysis	Protecting State Waters From PFAS Pollution Act (2024 <i>House Bill 1153</i> & <i>Senate Bill 956</i> )
4.	PCB Minimization Plan	Compliance with Baltimore Harbor PCB TMDL requirement
5.	Statistical Threshold Value (STV) criteria-based bacteria monitoring (April – October)	COMAR 26.08.02.03-3 EPA Recreational Water Quality Criteria

## PROPOSED PERMIT REQUIREMENTS (NEW), *cont'd*

### C. Maintenance

	Requirement	Rationale
1.	Climate Change Resiliency Report	Department Policy <a href="#">MDE Climate Change Webpage</a>
2.	ENR Operations and Maintenance (O&M) Guidance Checklist	Department Policy <a href="#">MDE Updated Nutrients Reduction in Wastewaters Strategy Webpage</a>
3.	Lab Certification Recordkeeping	Follow-Up to Consent Decree (24-C-22-000386)
4.	WWTP Operator Licensing & Certification Requirement	Follow-Up to Consent Decree (24-C-22-000386)

# PER-AND POLYFLUORINATED ALKYL SUBSTANCES (PFAS) MONITORING REQUIREMENT

---

## PROPOSED REQUIREMENT

- ☐ 4 definitive quarterly sampling events for influent, effluent and biosolids, within 12-months of study plan acceptance.

## RATIONALE

- ☐ 2<sup>nd</sup> Largest wastewater treatment facility in Maryland.
- ☐ Accepts wastewater from 22 Significant Industrial Users (SIUs).
- ☐ Generates “Class-B” Biosolids - used in land application.

## GOAL

- ☐ Characterize the occurrence and concentration of PFAS compounds in plant effluent and biosolids.
- ☐ Safeguard public health and down-stream water quality.

## MDE PFAS IN BIOSOLIDS WEBPAGE

- ☐ <https://mde.maryland.gov/PublicHealth/Pages/PFAS-in-Biosolids-Regulatory-Update.aspx>

# STATISTICAL THRESHOLD VALUE (STV) BACTERIA MONITORING

---

## PROPOSED REQUIREMENT

- ❑ Statistical Threshold Value (STV) criteria incorporated as an **Action Level** (not an *effluent limitation*) between **April 1<sup>st</sup> – October 31<sup>st</sup>** to ensure public safety during warm season.
- ❑ Action Level for Enterococci = 130 MPN/100 ml

## RATIONALE

- ❑ Geometric Mean (GM) value – calculated as 50<sup>th</sup> percentile – masks potential spikes in short term data. Enterococci GM limit is 35 MPN/100 ml.
- ❑ STV – calculated as 90<sup>th</sup> percentile – detects sudden spikes in short term data.
- ❑ Baltimore Harbor is designated as Use II (non-shellfish harvesting) waters, associated with water contact recreational use.
- ❑ Past occurrences of high bacteria counts in receiving waters resulting from untreated sewage releases.

## STATISTICAL THRESHOLD VALUE (STV) BACTERIA MONITORING, *cont'd*

---

### **FOLLOW UP ACTIONS**

If the 90<sup>th</sup> percentile value exceeds the Action Level at the end of the calendar month:

- ☐ Notify the MDE Beaches Program and local Health Department within 24 hours.
- ☐ Submit 5-day written report

### **GOAL**

- ☐ Protect primary contact recreation (swimming, boating, etc.) by ensuring timely detection and response.

# EPA ECHO WEBSITE FOR COMPLIANCE INFORMATION

<https://echo.epa.gov/facilities/facility-search?mediaSelected=cwa>

The screenshot shows the EPA ECHO website's 'Facility Search – Enforcement and Compliance Data' page. The interface includes a top navigation bar with links for Environmental Topics, Laws & Regulations, and About EPA. A search bar is located in the top right corner. Below the navigation bar, the ECHO logo and 'Enforcement and Compliance History Online' are displayed. A breadcrumb trail indicates the current location: Home > Facilities > Facility Search – Enforcement and Compliance Data. The main heading is 'Facility Search – Enforcement and Compliance Data'. The search interface is divided into several sections: 'Search Type' with dropdowns for 'Choose a Search Type' (set to 'Water') and 'Choose a Water Program Area' (set to 'None Selected'); 'Geographic Location' with dropdowns for 'EPA Region' (set to 'All Regions'), 'City', 'State' (set to 'All States'), 'ZIP Code', and 'County' (set to 'Select a State'); and 'Search Criteria Selected' with checkboxes for 'Permit Status' (Effective, Expired, Administratively Continued, Pending, Retired) and 'Permit Type' (NPD - NPDES Individual Permit, GPC - General Permit Covered Facility, UFT - Unpermitted Facility). A 'Results View' section at the bottom right allows users to choose between 'Interactive Map' (selected) and 'Data Table'. A 'Search' button is located at the bottom right of the search criteria section.

Use NPDES Number (**MD0021601**) and facility name to search the records.

# MDE WASTEWATER PERMIT SEARCH PORTAL

<https://mdewwp.page.link/WWPPortal>

The screenshot shows the MDE Wastewater Permits Interactive Search Portal. At the top, there is a navigation bar with links to Maryland.gov, Phone Directory, State Agencies, and Online Services. Below this is a header section with the Maryland Department of the Environment logo and a search bar. A blue navigation bar contains links to HOME, ABOUT MDE, AIR, LAND, WATER, MARYLANDER, PERMITS, and NEWSROOM. The main content area is titled "Wastewater Permits Interactive Search Portal" and includes instructions on how to use the search fields. It features several text boxes and dropdown menus for Facility Name, Address, City, Zip Code, State Num., NPDES Number, County, Watershed, Type, and Status. A "Search" button is located at the bottom right of the form.

Wild card characters are not supported in your search values but partial values are.

**Please note:**  
It may take around 30 seconds to return results

Facility Name:  Address:  City:

Zip Code:  State Num.:  NPDES Number:

County:  Watershed:

Type:  Status:

Use NPDES Number (**MD0021601**) OR State Number (**21DP0580**) to search the records.

## FACILITY AND OUTFALL LOCATION

## ACTIVE CONSENT DECREES

---

### **Consent Decree 24-C-22-000386**

- ❑ Entered on October 27, 2023.
- ❑ Mandates Baltimore City DPW to correct alleged NPDES permit violations at Patapsco WWTP within applicable deadlines, submit progress reports, and bring the WWTP into compliance.

### **Sanitary Sewer Overflows (SSO) Modified Consent Decree JFM-02-1524**

- ❑ Entered on October 6, 2017.
- ❑ Mandates Baltimore City DPW to eliminate SSOs through corrective actions using a two-phase approach. Requires submission of quarterly progress reports to EPA and MDE.
- ❑ Final upgrades and maintenance to be completed by December 31, 2030.

## SANITARY SEWER OVERFLOWS (SSOs)

---

### **General Condition III.C**

- ❑ SSOs are not authorized by this permit.
- ❑ This permit only authorizes treated surface discharge to Waters of the State.

### **Requirements**

- ❑ Records of maintenance performed to prevent SSOs must be kept and available upon request.
- ❑ If an SSO occurs, the permittee must notify, by telephone, both MDE and the local health department no later than 24 hours after occurrence.
- ❑ Additionally, the permittee must provide MDE with a written report of the event within 5 calendar days of the telephone notification.

# REPORTED SEWER OVERFLOWS MDE SEARCH PORTAL

<https://opendata.maryland.gov/d/stgj-u72u>

1. Click on the “Data” tab

2. Use column filters to view applicable records.  
Then “Export” your dataset.

The screenshot shows the Open Data Portal interface. The 'Data' tab is highlighted in the top navigation bar. Below the navigation bar, the 'Reported Sewer Overflows' dataset is displayed. A note states: 'NOTE: This dataset is no longer updated. Due to a change in databases, overflows after January 31, 2023 are reported at https://opendata.maryland.gov/dataset/Reported-Sewer-Overflows-New-for-2023-/stgj-u72u/data\_preview...'. The 'Last Updated' date is May 23, 2024. The 'Agency' is the Maryland Department of the Environment. The 'Date Created' is October 4, 2012.

# MAY 30<sup>th</sup> 2025, 5-DAY LETTER

## CITY OF BALTIMORE

BRANDON M. SCOTT, Mayor

## DEPARTMENT OF PUBLIC WORKS

Khalil Zaid, Director  
Abel Wolman Municipal Building, 6th Floor  
200 N. Holliday Street  
Baltimore, Maryland 21202

June 5, 2025

Mr. Andrew Gosden, Acting Program Manager  
Water Management Administration Compliance Program  
Maryland Department of the Environment (MDE)  
1800 Washington Boulevard  
Baltimore, Maryland 21230

Dear Mr. Gosden:

This is a follow-up to a verbal report made to Katie Baker of the Maryland Department of the Environment (MDE) on May 30th, 2025, regarding an internal unit bypass at the Patapsco Wastewater Treatment Plant (PWWTP), Discharge Permit 15-DP-0580, NPDES Permit MD0021601.

Due to a rainstorm on May 29<sup>th</sup>, 2025, there was a bypass of the ENR facilities at Patapsco Wastewater Treatment Plant. Per the National Weather Service, the Baltimore area received 0.76" of Rain from 5/30 to 5/31. Flow is delivered from the Secondary unit process to ENR via the Tertiary Pump Station (TPS) which comprises of five vertical turbine pumps, each with a flow capacity of approximately 30 MGD for a total facility capacity of 150 MGD. Due to electrical failures in TPS pumps number 2 and 4, the facilities capacity was approximately 90 MGD. Any flow that exceeds the capacity of the TPS is bypassed directly into the influent of the Chlorine Contact Chambers (CCC) through a series of weirs, where when needed the plant can directly dose chlorine for disinfection.

At 10:00 pm 5/30/2025 the plant influent flow exceeded 90 MGD. At this time Plant operators turned on the multi-point chlorine feed to the influent of the CCC to disinfect the flow bypassing ENR. The bypass lasted until 2 am on 6/01/2025, when the plant influent flow returned to below 90 MGD and ENR was receiving the entirety of the plant's flow. All flow that bypassed the ENR received full treatment for disinfection and neutralization prior to being discharged to the plant's receiving waters. The total amount of flow that bypassed the ENR process during this period was 42.7 million gallons. The effluent composite samples for 5/30 had a TN concentration of 11.6 mg/l, the sample for 5/31 had a TN concentration of 16.2 mg/l, and the sample for 6/01 had a TN 10.8 mg/l. Plant maintenance staff are currently working on repairs to TPS pumps 2 and 4 to restore the pumping station to its full pumping capacity.

Please do not hesitate to contact me if further information is required.

Sincerely yours,

Robert G. Hindt, P.E.  
Chief, Wastewater Facilities Division

CC: Mr. Paul Sayan, Department of Public Works

Dear Mr. Gosden:

This is a follow-up to a verbal report made to Katie Baker of the Maryland Department of the Environment (MDE) on May 30th, 2025, regarding an internal unit bypass at the Patapsco Wastewater Treatment Plant (PWWTP), Discharge Permit 15-DP-0580, NPDES Permit MD0021601.

Due to a rainstorm on May 29<sup>th</sup>, 2025, there was a bypass of the ENR facilities at Patapsco Wastewater Treatment Plant. Per the National Weather Service, the Baltimore area received 0.76" of Rain from 5/30 to 5/31. Flow is delivered from the Secondary unit process to ENR via the Tertiary Pump Station (TPS) which comprises of five vertical turbine pumps, each with a flow capacity of approximately 30 MGD for a total facility capacity of 150 MGD. Due to electrical failures in TPS pumps number 2 and 4, the facilities capacity was approximately 90 MGD. Any flow that exceeds the capacity of the TPS is bypassed directly into the influent of the Chlorine Contact Chambers (CCC) through a series of weirs, where when needed the plant can directly dose chlorine for disinfection.

At 10:00 pm 5/30/2025 the plant influent flow exceeded 90 MGD. At this time Plant operators turned on the multi-point chlorine feed to the influent of the CCC to disinfect the flow bypassing ENR. The bypass lasted until 2 am on 6/01/2025, when the plant influent flow returned to below 90 MGD and ENR was receiving the entirety of the plant's flow. All flow that bypassed the ENR received full treatment for disinfection and neutralization prior to being discharged to the plant's receiving waters. The total amount of flow that bypassed the ENR process during this period was 42.7 million gallons. The effluent composite samples for 5/30 had a TN concentration of 11.6 mg/l, the sample for 5/31 had a TN concentration of 16.2 mg/l, and the sample for 6/01 had a TN 10.8 mg/l. Plant maintenance staff are currently working on repairs to TPS pumps 2 and 4 to restore the pumping station to its full pumping capacity.

Pollutant	Requirements	Concentration Limit	Waste Load Allocation (WLA)	Regulatory Rationale
<b>Polychlorinated Biphenyls</b> (tPCBs)	73 & 81 MGD	N/A	27.2 g/year	Baltimore Harbor TMDL

## UPDATED AMMONIA LIMITS

---

- ❑ Adds a Daily Maximum Loading Rate and Daily Maximum Concentration to the Summer months (5/1 – 10/31).
- ❑ Adds a Monthly Maximum Loading Rate and Monthly Maximum Concentration to the Winter months (11/1 – 4/30).
- ❑ Current permit only includes Monthly Max Loading and Monthly Max Concentration for the Summer months. No explicit limits included for the Winter months.
- ❑ Permittee is allowed six months from effective date to adjust to the newer, more stringent limits.

# FAT, OIL AND GREASE (FOG) MITIGATION

---

## UPDATED REQUIREMENTS

- ☐ Submit an updated FOG mitigation plan.
- ☐ Formulate and implement an effective mitigation strategy.
- ☐ Incorporate source tracking and targeted strategies to identify and address FOG sources.

## RATIONALE

- ☐ Long-standing requirement to prevent clogging of collection system.
- ☐ Consistent with past requirement.

## GOAL

- ☐ Reduce and eliminate a major cause of SSOs in the WWTP service area.

## tPCBs: TOTAL ANNUAL LOADS (1/2020 - 12/2024)

## NOTICE OF TENTATIVE DETERMINATION & PUBLIC HEARING (P.1)

### MARYLAND DEPARTMENT OF THE ENVIRONMENT WATER AND SCIENCE ADMINISTRATION

#### **NOTICE OF TENTATIVE DETERMINATION AND PUBLIC HEARING**

##### **Baltimore City**

##### **Application for State Discharge Permit 21DP0580, NPDES Permit MD0021601:**

Baltimore City Department of Public Works, 200 Holliday Street, Suite 600, Baltimore, MD 21202, applied for renewal of the permit to discharge an average of 81 million gallons per day (MGD) of treated municipal wastewater from the Patapsco Wastewater Treatment Plant (WWTP), located at 3501 Asiatic Avenue, Baltimore, MD 21226, into the Patapsco River. The Patapsco River is designated as Use II, tidal waters. It is protected for estuarine and marine aquatic life and water contact recreation (migratory spawning and nursery use from February 1 to May 31, shallow water submerged vegetation use from April 1 to October 31, and open water fresh and shellfish use, except for shellfish harvesting – COMAR 26.08.02.08 K (2) (c) – from January 1 to December 31).

The Department is proposing a Tentative Determination (TD) to reissue the discharge permit with the following effluent limitations:

##### **At Outfall 001A for discharge up to 73 MGD:**

BOD5, 30 mg/l maximum monthly arithmetic mean, 45 mg/l maximum weekly arithmetic mean; Total Suspended Solid (TSS), 30 mg/l maximum monthly arithmetic mean, 45 mg/l maximum weekly arithmetic mean and 6,669,776 lbs/yr maximum annual load; BOD5 and TSS percent removal efficiency, 85% minimum monthly average; Total ammonia nitrogen as N, 4.9 mg/l monthly arithmetic mean and 21.6 mg/l daily maximum for summer period (5/1- 10/31), and 8.0 mg/l monthly arithmetic mean and no daily maximum for winter period (11/1- 4/30).

## NOTICE OF TENTATIVE DETERMINATION & PUBLIC HEARING (P.2)

At Outfall 001B for discharge up to 81 MGD, applicable six months after the permit's effective date:

BOD5, 27 mg/l maximum monthly arithmetic mean, 40 mg/l maximum weekly arithmetic mean; Total Suspended Solid (TSS), 27 mg/l maximum monthly arithmetic mean, 40 mg/l maximum weekly arithmetic mean and 6,669,776 lbs/yr maximum annual load; BOD5 and TSS percent removal efficiency, 85% minimum monthly average; Total ammonia nitrogen as N, 4.7 mg/l monthly arithmetic mean and 18.7 mg/l daily maximum for summer period (5/1- 10/31), and 7.9 mg/l monthly arithmetic mean and no daily maximum for winter period (11/1- 4/30).

Applicable for both 73 and 81 MGD effluent limits:

Enterococci, 35 MPN/100 ml maximum monthly geometric mean concentration; Dissolved Oxygen (DO), 5.0mg/l minimum any time, 6.0 mg/l minimum weekly average for period (2/1-5/31); pH maintained between 6.0 and 8.5; Total residual chlorine (if chlorine or any chlorine-containing compound is used in any treatment process), non-detectable level. Per Baltimore Harbor Total Maximum Daily Load (TMDL) allocations, seasonal loadings of 33,330 lbs of total phosphorus and 333,330 lbs of total nitrogen (5/1-10/31) and yearly loading of 27.20 grams/yr of tPCBs shall apply. Per Chesapeake Bay TMDL, a total phosphorus load of 66,700 lbs/yr and a total nitrogen load of 889,300 lbs/yr shall also apply.

The permit also has conditions covering Wastewater Capacity Management, Biomonitoring, Pretreatment, Climate Change Resiliency Requirements, Maintenance of Laboratory Certification Records, Testing and Analysis of Per- and Polyfluorinated Alkyl Substances (PFAS), the Compliance Schedule for Meeting Total Ammonia Nitrogen as N Effluent Limits, Monitoring, Reporting and Minimization for Polychlorinated Bi Phenyls (PCBs), Operations and Maintenance Guidance Checklist Requirements, Wastewater Treatment Plant Operator Licensing and Certification, and the Protection of Water Contact Recreational Activity in the Receiving Waters.

This permit is in conformance with the "Chesapeake Bay TMDL for Nitrogen, Phosphorus, and Sediment" approved by USEPA on December 29, 2010.

The Department has scheduled a public hearing for **Thursday, June 12<sup>th</sup>, 2025 from 6pm – 8:30pm** for the tentative determination of the above permit. The hearing will be held at the **Curtis Bay Recreation Center, 1630 Filbert Street, Baltimore, MD 21226.**

## NOTICE OF TENTATIVE DETERMINATION & PUBLIC HEARING (P.3)

---

The public hearing documents, including the permit application, draft permit, and Summary Report & Fact Sheets (SRFS) are available on MDE's website at <https://mdewwp.page.link/WWPPortal>. Search for "21DP0580" under "State Num" and click on the "More Info" button for the permit entry of your interest to generate a list of available documents for download.

To enhance participation in this public hearing, please use the link to register online by following the instructions on the MDE webpage: <https://mdewwp.page.link/PublicMeetings>.

The hearing will be recorded and transcribed. Persons who wish to present information regarding the tentative determination may speak at the public hearing, submit written comments at the public hearing, or submit a written statement to the Department no later than **5 pm on June 20, 2025**. All comments will be considered in making a final determination. Comments received via any submission mechanism will all be given equal weight.

Written comments can also be sent via mail to the **Maryland Department of the Environment, Water and Science Administration, 1800 Washington Blvd., Baltimore MD 21230-1708, Attn: Mr. Yen-Der Cheng, Chief, Municipal Permits Division** or via email to [Yen-Der.Cheng@Maryland.gov](mailto:Yen-Der.Cheng@Maryland.gov). The supporting information for the tentative determination, including the draft permit and fact sheet, may be reviewed by contacting Mr. Cheng at the above address or by telephone at 410-537-3363 or 1-800-633-6101 to schedule an appointment. Copies of documents may be procured for \$0.36 per page.

Any hearing-impaired person may request an interpreter to be present at the hearing by giving ten working days notice to Mr. Cheng at the address or telephone number listed above.

To Be Published on: **May 2 and 9, 2025**
